

# NSpire

## Introducing the First Fully Packaged Indoor System

A fully packaged indoor system that eliminates the need for an exhaust fan and a remote condenser.

NSpire is available in capacities ranging from 2 to 16 tons and is ideal for smaller applications such as hotels, swim schools, and condominium buildings.

## Key Features

- Fully installed indoors, no outdoor air condenser, fluid cooler, or external piping required.
- Cost-effective and time-saving solution for contractors.
- Splitable with quick connect for accessibility.
- Reduced owner liability because it is factory packaged.
- Less refrigerant than split air-cooled.
- Available with low dew-point configuration.
- Compatible with low source capture design to improve Indoor Air Quality (IAQ).
- Eliminates the risk of seasonal refrigerant migration.
